

PREPRESS

Industry experienced technicians coupled with the leading prepress systems and multiple proofing options provide assurance that your project will move through the production channels quickly and accurately.

- Support for all Mac and leading Windows platform application files
- Convenient file transmission
- Heidelberg Prinect workflow management system
- High resolution, G7 calibrated proofing systems
- Digital platesetter

OFFSET PRINTING

Multiple high-speed presses, as well as smaller format machines, allows us to match your project with a press that will provide the fastest turnaround at the best price possible.

- Single-color through six-color capability
- G7 calibration of all multi-color presses
- Closed loop technology for color consistency throughout the entire press run
- In-line aqueous coating
- In-line flood UV and spot UV coating
- Automated color ink matching system

DIGITAL PRINTING

The capabilities of digital presses make them ideal for variable data printing where text, graphics and images can be customized from one printed piece to the next.

- Black or 4-color process, offset quality printing
- Sheet size to accommodate full 11 x 17" with bleed
- Accepts coated and uncoated paper
- 2400 x 2400 dpi resolution
- Smooth, offset-like matte finish
- 1.0 mm front to back registration
- Duplexing capability
- In-line booklet finishing
- Variable data printing capability

BINDERY

Whether you're printing books, annual reports, presentation folders, brochures or business cards, each printed project requires a unique finishing touch. Our capabilities include a complete range of traditional finishing techniques as well as specialty services for the most demanding customized projects.

- High speed folding
- Precision cutting
- Saddle stitching
- Perfect binding
- Case binding
- Plastic coil and spiral wire binding
- Wire-o binding
- Embossing
- Foil stamping
- Die-cutting
- Shrink wrapping
- Collating
- Laminating
- Round cornering
- Drilling
- Padding
- Perforating
- Kit assembly
- Individual and bulk boxing
- Bulk and individual shipping

MAILING

In addition to our print production services, World Arts offers a full service in-house mailing department. Using state-of-the-art software, our mailroom experts review all materials to assure a smooth process for each mailing project.

- Inserting
- Sealing
- Tabbing
- Addressing
- Labeling
- Bar coding
- Stamping, metering, permit imprinting
